

Jiayu Song

Beijing

PRACTICE AREAS

- Intellectual property

PROFESSIONAL EXPERIENCE

Ms. Song has an interdisciplinary educational background in both computer science and law. Her practice focuses on intellectual property matters, particularly dispute resolution and transactional matters involving software, telecommunications, and artificial intelligence technologies.

Ms. Song has been involved in patent litigation and invalidation proceedings relating to software and telecommunications technologies. She has also assisted clients with intellectual property transactions and intellectual property due diligence in the areas of software, data, and artificial intelligence. In addition, Ms. Song advises companies on intellectual property management and protection strategies, including those relating to software, artificial intelligence, and data-related intellectual property.

Drawing on her technical and legal background, Ms. Song provides clients with practical and business-oriented advice on the development, commercialization, protection, and enforcement of intellectual property rights in emerging technology sectors.

EDUCATION

Ms. Song received a Bachelor of Engineering degree from Beijing Language and Culture University in 2020. In 2024, she obtained a master's degree in law from the University of International Business and Economics.
